Art Unit: 1616

Claims 1-16 are pending in this application.

Claims 1-16 are generic to a plurality of disclosed patentably distinct species comprising

(i) a source of hydrogen peroxide such as hydrogen peroxide or sodium perborate, and (ii) hydrogen peroxide stabilizer(s) such as a **specific** compound of formula I (i.e. not the broad "formula I") or diethylene triamine penta(methylenephosphonic acid). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of (i) **and** (ii), supra, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
